

SEWER DISPOSAL LIST

(For assistance, please contact EHS at (402) 472-4925, or visit our web site at <http://ehs.unl.edu/>)

This document specifies certain conditions where dilute chemicals may be disposed to the sanitary sewer under Special Waste Disposal Permit No. 002700539-010. This permit is only applicable to University of Nebraska-Lincoln facilities located in Lancaster County. Disposal may only be made to a sanitary sewer, and not to a septic system or storm sewer.

- Only aqueous solutions solely containing the chemicals listed here may be disposed to a sanitary sewer. Solutions containing chemicals not included on this list, regardless of concentration, may not be disposed to the sanitary sewer.
- A maximum of 1 liter (before dilution or neutralization) of any specific chemical may be placed down an individual drain each day (unless otherwise specified).
- Further instructions regarding dilution and/or neutralization that must be followed prior to disposal are described below for some chemicals. **Note: Do not neutralize any solution with an initial pH of ≤ 2 or ≥ 12.5 without first contacting EHS, as such activity is subject to certain hazardous waste regulations.**
 - For neutralization, follow any acceptable lab procedures regarding neutralizing the chemical.
 - The pH of all chemicals must be in the range of 5.5 to 9.5 before disposal.
 - Dilution is based on volume and must be made with water.
 - The entire amount of the solution following treatment may be disposed at one time, even if the resulting total volume is greater than 1 liter.
- Water must be run down the drain for a minimum of 5 minutes after each disposal incident.

For technical assistance, please call EHS at (402) 472-4925 prior to disposal.

Further Instructions	Chemical – Liquids Only
None	Acetate Buffer
None	Acethropan
None	Acetic Acid
None	Acetic Acid, Glacial
None	Acetyl Coenzyme A
None	Acetylglucosamine
Must be neutralized	Acetylsalicylic Acid
None	Aconotase
None	Cis-Aconitic Acid
None	Adenine (Hemisulfate)

Further Instructions	Chemical – Liquids Only
Dilute 10:1	Adenosine
None	Adenosine 5'-Diphosphate
None	Adenosine 5'-Monophosphate
None	Adenosine 5'-Triphosphate
None	Adenosine 5'-Triphosphate Agarose
None	5'-Adenylymidodiphosphate
None	Agar
None	Agar, Bacto
None	Agarose
None	Agarose I
None	L-Alanine
None	Low Melting Point Agarose (Seaplaque)
None	Albegal SET
None	Albumin
None	Alcohol Dehydrogenase
None	Alconox
Must be neutralized, Dilute 10:1	Alginate Acid
Dilute 10:1	Alumina
Dilute 10:1	Aluminum Oxides
Dilute 10:1	Aluminum Silicate
Dilute 10:1	Aluminum Sodium Sulfate
(Must be neutralized, Dilute 10:1)	Aluminum Sulfate (if Acidic)
None	Amino Acid
Must be neutralized, Dilute 10:1	Aminoacetic Acid
None	Aminopyrrolidine Hydrochloride
None	Aminoquanidine HCl
None	Ammonium Bicarbonate
None	Ammonium Carbonate
Dilute 10:1	Ammonium Chloride
Dilute 10:1	Ammonium Citrate
Dilute 10:1	Ammonium Lactate
None	Ammonium Molybdate
Dilute 10:1	Ammonium Phosphate
None	Ammonium Salicylate
None	Ammonium Stearate
Dilute 10:1	Ammonium Sulfate
None	Ammonium Valerate
None	Ampholine
None	Amyloglucosidases
None	Amylopectin
None	Amylose
Must be Autoclaved	Animal Serum
None	Anti Chlor (liquid)
None	Antifoam A

Further Instructions	Chemical – Liquids Only
None	AP Color Development Reagent, Fast Red
None	AP Color Development Reagent, Naphthol Phosphate
None	Apigenin
None	Aprotinin
Dilute 20:1	Apyrase
Dilute 10:1	Arabinose
None	Arginine HCl
None	L-Arginine HCL
Must be neutralized, Dilute 10:1	Ascorbic Acid
Must be neutralized, Dilute 10:1	L-Ascorbic Acid
None	Asolectin
None	Asparaginase
None	Asparagine HCl
None	L-Aspartic Acid
None	Avidin-alkaline Phosphate
Dilute 20:1	Azocoll
None	Bacteriorhodopsin
None	Bacto Agar
None	Bacto Yeast Extract
None	Bacto-Lactose Broth
None	Bacto-Nutrient Broth
None	Bacto-Peptone
